**Plug
Peddler
Quick Tip!**

Can a pipe plug be used to block elliptical pipe? Yes

What size pipe plug should be used for each different size of elliptical pipe. (See the chart below)

Round Equivalent	Elliptical Pipe Size		Recommended Pipe Plug Usage Range
	Rise	Span	
18"	14"	23"	12"-24"
24"	19"	30"	15"-30"
27"	22"	34"	18"-36"
30"	24"	38"	18"-36"
33"	27"	42"	24"-48"
36"	29"	45"	24"-48"
39"	32"	49"	24"-48"
42"	34"	53"	24"-60"
48"	38"	60"	24"-60"

Both the Rise and the Span (fall) must be covered by the pipe plug's usage range. The plug itself must be small enough to fit in the rise of the pipe and the plug's maximum usage range must be large enough to cover the span of the pipe.
